The AutoCAD License AutoCAD is a commercial or perpetual license model. The license model is, for the most part, determined by the CAD application's number of employees. Using software that has fewer than 10 employees, AutoCAD is licensed on a perpetual basis. Using software that has more than 10 employees, AutoCAD is licensed on a "person or organization" basis. For example, a single developer can use 100 AutoCAD licenses on a per-person basis, while a department with 100 employees would have to pay Autodesk \$1,000 per month for the same number of licenses. Additional AutoCAD 2017 users can be added to the per-person license for \$1,000 per month. Additional AutoCAD 2017 users can also be added to the per-person license for \$1,000 per month, and a desktop user license can be acquired for \$1,750. Licenses are not transferable between licenses. Licenses for AutoCAD can also be sold and rented through Datemil. For example, users can purchase AutoCAD 2017 licenses at a rate of \$10,000 per year. Autodesk will also offer annual "AutoCAD Enterprise" upgrades for CAD users. AutoCAD Enterprise 2017 is available to AutoCAD Enterprise 2016 users, and is sold for \$2,000. Users who want AutoCAD Enterprise 2017 for the first time will need to purchase a license. In addition to additional features and components, AutoCAD Enterprise 2017 includes the option to run the AutoCAD suite as a Web app. AutoCAD (2017) Review AutoCAD 2017 is designed to deliver
