

Clusty is a widget which will allow a search phrase to be entered and then any result from the search be given back a unique url. This will allow you to instantly access any information you need. Installing Clusty: At the Opera Web Store, you will find a Widget Installer. You just click the Install button, and follow the instructions on the screen. Then, when you want to use Clusty, click the Clusty icon on your Opera toolbar. Clusty will then automatically run. Adding a Search Keyword: The search box is set to default to: and then you enter your search keyword: Using Clusty: As you enter your search keywords you will see lots of results returned: and you can access them by clicking the corresponding link. A couple of cool things: 1. You can upload your own keywords: 2. You can even change the color scheme: 3. You can change the text size: 4. You can change the fonts: Using Clusty: By default, the results will be collapsed: you can change this by clicking the small info icon in the top right corner of the search result box. You can now scroll through the results: Clusty will continue to search as more results are shown. Once you find the site you need, it will stop searching: and you can browse the site in the window by clicking the top right corner to open the view options: You can even save the link to your Favorites: To close the search: Just click the close icon in the top right corner of the search result box. Clusty is great for quickly finding information on the web! 1. Field of the Invention The present invention relates generally to vehicles and more specifically to a vehicle having a modular interior. 2. Description of the Prior Art It is known to provide a modular interior for a vehicle. For example, a U.S. Pat. No. 7,325,709 to Gay et al. discloses a modular vehicle seat assembly and method for creating modular vehicle seat assembly in which an interior shell (11) is provided. The interior shell (11) has at least one opening (15) for vehicle access. A plurality of one-piece seat panels (40) are movably coupled to the interior shell (11) in a non-interfering manner so as to form

What's New In?
