Jul 14, 2017 Status: Mostly working on AC3 1.2.2. Some things might not be working but I have made this in error. i.e.: The Cutscene kill all the enemies of all the characters!. Ctrl+S on XBOX1, Control+Num4 on PS3. I'm going to get the other cheat code out soon. This game has alot of cutscene code to change. The trainer works with the Full Version of Assassin's Creed: Valhalla. All Levels and bosses are in godmode. If you are a pro at this game just turn off the godmode and you should be able to get to the next level in no time. You must do the whole level on godmode, both normal and difficult. If you have the same thing happen, just go back to where you were and begin again. Dont leave a situation thinking it would be easy to just continue in godmode. The game gets hacky if you do that. And be sure you have the cheat code for all the possible things that could happen in the game. e.g. If I turn off weapons, there are situations where I will get an item right there. To prevent that go into the trainer and turn off all your items. Then go all the way back and turn on all your weapons and you should be ready to go. Sep 27, 2017 If you are playing the custom level (like the lv. 2), the button shortcuts are the following: Left, Right, Down, Up. Please see cheat codes above (1.0). God Mode: If you are playing on hard difficulty (or more difficult) and press the up and down buttons and you go past the new light area (area before the game starts), the game will reset. This will allow you to play through the game level faster. You will not find this when going through the area with the difficulty down. When you die (if you still have progress), you will lose progress. So when you die on hard difficulty, before dying, you will want to jump into God Mode. If 1cb139a0ed
