What's New In IP-Info?

IP-Info is a software application that provides users with a simple means of fetching your IP address and other data from the IP-Config file. Installation: The installation process can be easily bypassed, as this product is portable. This also means that, unlike installers, it is not going to add any new items to the Windows registry and hard drive, and no leftovers are going to remain on the disk after its removal. Uses: This app is designed with a single purpose in mind – to provide users with a means of viewing and extracting IP address data from the IP-Config file. Who is it for: Whether you are a beginner or a professional, IP-Info is a portable application that requires no installation. Whether you use it on the office PC or on your laptop, it will get the job done for the most part. IP-Info is a software application that provides users with a simple means of fetching your IP address and other data from the IP-Config file. The upper hand of a portable app The installation process can be easily bypassed, as this product is portable. This also means that, unlike installers, it is not going to add any new items to the Windows registry and hard drive, and no leftovers are going to remain on the disk after its removal. It is also important to mention here that by placing the program files to a USB flash drive, you make it possible to take IP-Info anywhere with you and run it on any PC you come in contact with. Bring up data and copy it to the Clipboard First and foremost, you should know this tool requires administrator rights in order to function. It lets you view in an intuitive GUI information gathered by the IP-Config file. To be more precise, you make it possible to view your external and local IP address, as well as host name, obtained and expiry lease date, physical address of the Ethernet and LAN, node type, and DNS and DHCP servers. In addition to that, it is possible to refresh the external IP with just a click of the button, as well as copy both types of addresses to the Clipboard, so that you can use them with another utility. You can also select data that interests you from the main window and copy it. Bottom line To conclude, IP-Info is a pretty simple, yet efficient piece of software when it comes to display information about your network. It is dedicated to all types of users
