**Adobe Audition 3.0 Authorization Code**

5.1 entire agreement. this agreement, the software license, and any documentation related to the software constitute the entire agreement between you and adobe regarding the use of the software, and

---

it supersedes all prior agreements and understandings regarding such use. adobe does not recommend the use of non-standard versions of the software. adobe retains the right to terminate the license granted hereunder. in the event of such termination, you will

---

receive a refund of all license fees previously paid. adobe may, at its sole discretion, terminate your access to the software or your use of the software, with or without notice, for any reason or no reason at all. you can remove the license key from your copy of the software by following

---

the instructions included in the file “readme.txt.” the license key is embedded in the file in such a manner that it cannot be removed or altered. any such termination shall not constitute a termination of this license. 3.4.3 use the software in a manner that violates any applicable law,

---

rule, regulation or ordinance (“legal violation”), or in a manner that infringes any patent, trademark, trade secret or other intellectual property rights of adobe or any third party; no, it is not a stretch to say that adobe wants to make your life easier. its really very simple. make

---

sure you have a valid serial number on your hard drive. from there you can log into your account and download the software, and then download the activation serial numbers for the software, assuming its not deactivated. one final thing. for those of you who have signed up for the adobe

---

creative cloud, you get to keep the software for the duration of your subscription, and you won't have to pay any fees for activation. however, if you deactivate the software, adobe says that you will have to reinstall the software. i imagine that they are considering this as

---

a revenue stream for their product, and that a lot of people are already using the software, so if they can make money that way they will take that route.
