While Lightroom got a big update and Photoshop did not, the solution is significantly better than it used to be. Frankly, the changes in Lightroom speak for themselves (actually, the update quality has improved rather than vice versa), so I will spend more time discussing the improvements in the most suitable places in this review. Fault-tolerant, automated backup for Lightroom, and the ability to use a network drive in Airwork's own Bridge are among the enhancements for the program that's used by most professionals to edit photos. The software also lets you make quick changes to photos by just selecting them on a timeline, and even slice and dice photos with new grid-like features. Lightroom 5 for Mac includes other new features for free, such as a new node object selection tool, an augmented feedback for Creative Cloud subscribers, and the ability to join images you're syncing from an iPad to a larger desktop screen in a floating panel. I used Lightroom 5 for Mac on a slightly older MacBook Pro that has problems with newer OS X updates, but the latest release was still productive. The next-generation tool seems to be less about revolution than evolution. For starters, the speed of image adjustment is similar to in Photoshop CS6. In addition, there's a new focus on less being more with adjustments. Adjustments that were hard to control in previous versions are now easier to get right. Necessarily, that comes at the cost of more options, more automation, and the ability to delete adjustments—which can sometimes be a bad idea.
